

SafePay™ NR2

Next generation note recycler for closed cash handling

When bank notes are paid into the SafePay™ NR2, they enter a completely closed and secure system. All notes are automatically authenticated and can be recycled as change for other customers. For collection, the notes are deposited into an ink-protected transportation cassette. This ensures their secure transfer from the checkout to the back office and simplifies the collection process for CIT. Even during refilling or maintenance, the notes are never exposed.

With SafePay NR2, cashiers are relieved of time-consuming back-office cash administration. Notes arrive checked and counted in the back office and cash totals are monitored online using SafePay Control software.

Suitable for traditional checkouts, self-service checkouts and payment stations, SafePay NR2 can be used as a single note payment solution for the whole store.

BENEFITS AT A GLANCE

- Closed and controlled cash handling at checkout and in back office
- High level of security with ink protection and logging of potential fraud attempts
- Recycling transport cassettes for automatic deposit for CIT pick-up without manual end-of-day cash handling
- Simple staff maintenance
- Designed for self-service or cashier operation

Together with the SafePay CR2 coin recycler, SafePay NR2 forms part of the SafePay closed cash handling solution for retailers.

Next generation note recycler for closed cash handling

Product Features

Easy to Use

- Configurable for cashier operation or self-service
- Single slot for payment and dispensing
- Can handle multiple currencies
- Equipped for CashBack

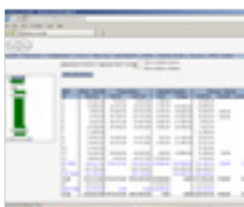

Closed and Secure System

- Cash never exposed during refilling, transportation or maintenance
- Ink protection of notes at checkout and during transportation
- ECB certified authenticity control (Euro)
- Floor-anchored for physical protection

Back Office Cash Administration Removed

- Cash arrives counted and checked in closed cassettes from the checkouts
- Recycling cassettes automatically emptied into transfer units for secure CIT pick-up
- Online control and reporting through SafePay Control software

Simple Maintenance

- Staff can solve problems quickly themselves
- Plug and play replacement of key parts
- Problem solving information clearly displayed on standard POS screen and in back office through SafePay Control software

ABOUT CLOSED CASH HANDLING

SafePay™ NR2 forms part of the SafePay closed cash handling solution for retailers. Closed cash handling protects cash from the moment a customer pays all the way to the cash-counting centre – no gaps in security and no weak links in the chain. It replaces manual tills with a much more secure system which recycles cash and removes cash differences.

Gunnebo is a pioneer in this field and has worked closely together with leading European retailers to develop SafePay – a reliable, secure and efficient closed cash handling system.

TECHNICAL DATA

Dimensions (BxDxH mm)	210x479x738
Weight	53kg
Speed	1 note per second
Storage capacity	Up to 800 notes
